DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Species II, figure 3, claims 6, 7, 9, and 11, in the reply filed on 8/4/05 is acknowledged.

Response to Arguments

Applicant's arguments filed 4/13/05 with respect to the claims have been fully considered and are persuasive. Therefore the rejection of all claims has been withdrawn.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 6, 7, 9, and 11 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 of U.S. Patent No. 6,617,693. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only difference is "a distance between the chip connection portions arranged along a first side of said at least one pair of opposite sides is shorter than a distance from the chip connection portions arranged along said first side of said at least one pair of opposite sides to the chip connection portions arranged along a second side of said at least one pair of opposite sides", which is not patentable distinct.
